

Древнерусские менаеи XI–XIV вв. в лингвистическом и текстологическом аспектах

Авторы: А.А. Афанасьев, А.А. Афанасьев
07.09.2014 г.

The Menaion has a profound value in the history of Slavic languages. While in most studies linguistic-textological methodology is used to reveal textological typology, the current paper uses data-driven methods to classify Old Slavic manuscripts. Cluster analysis is applied to a variety of the Menaions, providing new evidence for the established textological typology.
