

Исследование особенностей 15-вековых русских официальных документов. Автор: Пенкова Е.А.

Авторы: Е.А. Пенкова
07.09.2014 г.

This paper is devoted to the study of certain regional features of 15th-century Russian official documents. The author examines the usage of the verb forms arising from the stem bud- in official documents of Moscow and Novgorod, identifies several dialect differences between them and suggests that some regional parameters should be introduced in the historic-text subset base of the Russian National Corpus, providing access to the study of local features from the history of the Russian Language.
