07.09.2014 ã.

The report considers
research based on the reissue of the Russian
Academy Dictionary of 1789–1794 (RAD) and two grand-funded follow-on
projects the creation of an integrated toolkit for the automation of research
on the RAD, and the development of vocabulary components of an integrated
information technology for the reissue of 18th– and
early 19th-century printed sources. Their main objectives and
results are described. Examples of educational projects in font creation, frequency
studies of historical texts and OCR technology are provided.
