Summary

Among the most valuable historical sources of the Latvian State Historical Archives there is a collection of documents, which provides historians with firsthand information about the relations of Muscovy Rus, Russian, Belorussian lands and towns (Smolensk, Novgorod, Pskov, Polotsk, etc.), as well as Lithuania with Riga, Livonia, Hanseatic League and some German towns in the late 12th &mdash; early 18th centuries. The historical name of this document collection is &ldquo;Moscowitica-Ruthenica&rdquo;. In order to stimulate the circulation of these documents within the historical science, a new complete edition (both &mdash; a paper one and an electronic one) of the collection &ldquo;Moscowitica-Ruthenica&rdquo; seems to be urgent. In achieving this purpose XML-technologies should be used.
