Ýëåêòðîííûé êîðïóñ ðåãèîíàëüíûõ òåêñòîâ "Æèçíåííûé êðóã": ïðîáëåìû òèïîëîãèè

Àâòîð Þëèÿ Íèêîëàåâíà Äðà÷åâà
07.09.2014 ã.

This
article deals with typology problems arising from an electronic corpus of regional
texts. Using the Circle of Life corpus, the authors describe how to
analyze the functioning of concepts in key regional cultural texts. The
studying of key regional cultural texts in the form of corpora reveals basic
concepts of a local language’s picture of the world and provides a key to
comprehending traditional culture, such as that of the Russian North.
