Àâòîð Íàòàëüÿ Àíàòîëüåâíà Òþðèêîâà
07.09.2014 ã.

This article
considers the basic principles for creating a thesaurus for the subject domain
of office work and archiving. It is shown that representation of logic-semantic
relations in the thesaurus is determined in many respects by the sphere of its
application. Basic requirements for components of terminological thesaurus articles
are formulated.
