07.09.2014 ã.

The development of
any linguistic corpus fulfills the need to improve
educational programs, textbooks, manuals and teaching materials used in
language teaching in the era of information technology. Due to the lack of
textbooks and manuals for teaching Buryat, the availability of the Buryat
Corpus online will speed the development of and enrich the teaching process
thanks to availability of an online view of contemporary usage of Buryat.
Various didactic books can be prepared using data from the Corpus.
